

"Concert Shop" for STRINGS

"Concert Shop" blends concert performance with an interactive, hands-on workshop for string students. Using sound effects traditionally made for electric guitar & looping, Caryn creates on-the-spot recordings of her violin, voice, & percussion. Layers of sound over deceptively simple melodies result in music which is both other worldly & totally catchy, mesmerizing & unique. Artfully combining new age, world & classical-ish, it inspires and transforms the listener.

The students will:

- have hands on experience using Caryn's equipment, sound effects, looping, & electronics.
- learn the basic differences between acoustic & electric violin playing
- be encouraged to think "out of the box" and experiment, applying their own training
- hear encouraging ideas about PRACTICING
- come away inspired to continue their training
- will have insight into the future of electronic music
- be involved in discussions about music, composition, & technology

ASTA/NJ Chamber Music Institute

"We got excellent & positive feedback from the students. They had a great time & the balance of performance & interaction was just right. Thanks again for the great work you did with our students. "

Neil Aaronson, Ph.D. Program Director, ASTA/NJ Chamber Music Institute at Kean University
